

VERSION WITH MARKINGS TO SHOW CHANGES MADE

80. (Amended) A computer controlled display device, comprising:
- a flat panel display having an input for receiving display data;
 - a moveable assembly coupled to said display, said moveable assembly providing at least three degrees of freedom of movement for said flat panel display device and having a cross-sectional area which is substantially less than a cross-sectional area of a display structure of said flat panel display; and
 - an anti-torsion device coupled to said moveable assembly, said anti-torsion device preventing [located within said moveable assembly to prevent] a cable located within said moveable assembly from being rendered inoperable.
